

Duke Parkinson's Disease and Movement Disorders Program

Expedited routes for comprehensive surgical evaluations

Centers of Excellence for Parkinson's disease, Huntington's disease, and Dystonia

Specialized surgeons with advanced training in functional neurosurgical management

Overview

We offer comprehensive evaluation and interdisciplinary care for patients with movement disorders, providing options to reduce or eliminate symptoms and improve mobility and quality of life for individuals of all ages.

Our experienced team offers the full spectrum of care for movement disorders, including, but not limited to:

- Parkinson's disease and Parkinsonism
- Progressive supranuclear palsy (PSP)
- Corticobasal ganglionic degeneration (CBGD)
- Multiple system atrophy (MSA)
- Tremors, including essential tremor
- Dystonia
- Huntington's disease
- Chorea
- Motor stereotypies
- Tardive dyskinesia (TD)
- Tics and Tourette syndrome
- Wilson's disease
- Ataxia, including spinocerebellar ataxias
- Hemiballismus
- Hemifacial spasm
- Myoclonus
- Restless legs syndrome

Why Refer to Duke

We accept referrals for patients at all stages of their disease, from new diagnoses to advanced care needs. Our providers utilize a comprehensive suite of resources and interdisciplinary professionals to help your patients live their fullest lives.

We offer:

- Recognized Centers of Excellence, providing the highest level of testing, diagnosis, and management services
- Network of clinical trials for innovative therapies and procedures
- Comprehensive movement disorders specialists, including neurologists, neurosurgeons, social workers, nurses, pharmacists, and physical, occupational, and speech therapists
- Advanced surgical options, including deep brain stimulation (DBS) and high-intensity focused ultrasound (HIFU)
- Nonsurgical treatment options, including medication and botulinum toxin injections

To refer a patient for evaluation, log in to Duke MedLink or call 919-668-7600.

For surgical referrals, contact our navigator at 919-668-2852.
