

# Tips to Prevent the Spread of COVID-19

## Patient Education

Avoid crowds.

A crowd means any big group of people.

To practice physical distancing:

Stay home as much as possible

Enjoy quiet outdoor spaces only with others in your household

Stay at least 6 feet apart

Walk your pet

Do not hold hands

Stay home if you feel sick.

Your provider can tell you if you need an evaluation.

If you have a fever, cough and/or runny nose:

Contact your provider before getting care

Stay in bed

Watch TV or read a book

Do not use public transportation, if possible

Wear a mask if you have to go out

Do not go to public areas, school or work

Cover coughs and sneezes.

Do this when you are sick and if you have allergies.

Remember to do these important things:

Use a tissue or handkerchief

Use your sleeve or elbow

Put used tissues in the trash

Wash your hands

# Tips to Prevent the Spread of COVID-19

## Patient Education

Clean frequently used surfaces. Do this daily, after heavy use or after someone who is sick uses an area.

Use soap and water, 70% alcohol, or diluted household bleach (4 teaspoons per quart of water):

Door knobs

Taps and faucets

Cell phones and TV remotes

Light switches

Toilet handles and seat covers

Counter tops and tables

Clean your hands often. Do this for 20 seconds or while singing the alphabet song.

Use soap and water or 60% alcohol hand sanitizer to clean your hands when you:

Enter a building and home

Use the bathroom

Sneeze or cough

Take public transportation

Eat or prepare food
