

Duke Children's Procedural Sedation Unit

Safe, effective sedation
for infants, children

Easy scheduling and fast access

One of 10 Centers
of Excellence for
Pediatric Sedation
in the U.S.

Overview

We provide safe, effective sedation for infants, children, and adolescents undergoing diagnostics or procedures that may cause pain or anxiety or require the patient to remain still.

Our experienced team works with you and other Duke specialists to diagnose and manage care for your patients to ensure appropriate sedation planning and monitoring for a wide range of procedures, including but not limited to:

- MRI, CT, and other advanced imaging
- Lumbar puncture and bone marrow aspiration
- PICC line and central line placement
- Minor surgical or interventional procedures
