Overview

We offer comprehensive evaluation and care to your patients with liver disease.

Our experienced team works with you and other Duke specialists to diagnose and manage liver and bowel diseases in children, including, but not limited to:

- Acute and chronic liver failure
- Alagille syndrome
- Biliary atresia
- Choledochal cysts
- Cholestasis
- Intestinal failure
- Liver tumors
- Metabolic liver disease
- Nonalcoholic steatohepatitis (NASH)
- Short bowel syndrome

When to Refer to Duke

Pediatric Hepatology

- Concern for underlying liver disease

Transplant Evaluation

- Liver-disease complications that appear to jeopardize your patient's ability to function normally.
Signs and symptoms include:
 - Coagulopathy
 - Decreased quality of life, as indicated by fatigue, significant itching, mood changes, or encephalopathy
 - Development of ascites or varices
 - Failure to thrive
 - Hyperammonemia
 - Hypoalbuminemia / Hyperbilirubinemia
 - Spontaneous bacterial peritonitis or recurrent cholangitis
 - Variceal bleeding

Duke Pediatric Liver Transplant Program

Your Patients Will Have Access To:

Liver Transplant Specialists

Our surgeons have special expertise in performing liver transplants and offer:

- Split-liver and pediatric liver transplants
- Laparoscopic and open resection of primary and metastatic hepatic tumors
- Excellent outcomes in multi-organ transplants: simultaneous transplantation of the liver and the kidney, heart, lung, small bowel, and/or pancreas

Clinical Trials

We screen every patient for clinical trial eligibility to give your patients access to novel therapies.

Qualified Donors

We offer deceased and living-donor liver transplantation and participate in national registries for benchmarking quality.
